

Purdue University equips students with big data know-how

One of the country's most respected computer science programs relies on OpenStack Private Cloud to power its database curriculum.

Our customer

Located in West Lafayette, IN, Purdue University prepares graduates for real-world tech jobs, producing more engineering students than any other school in the U.S.

The obstacles they faced

Purdue needed an updated OS in order to teach big data analytics and engineering using Intel's powerful, leading-edge data curriculum.

How we helped

Infrastructure; Managed Cloud; Private Cloud — OpenStack® Private Cloud Powered by OpenStack.

What we achieved together

Rackspace engineered a private cloud OS to support an advanced curriculum and allow the school to launch courses that prepare students for jobs at leading tech companies.
